Funky Mat Mousemat: **Square 200 x 200mm**

The black line is the 'bleed line'. If you have an image, background image or fill that you want to completely cover your mouse mat then you should ensure that it extends to the black line.

The red line is the cut line and represents the final finished size of your mouse mat.

The blue line is a 'safety margin' - it's best to keep all your graphics and text within this line unless you intend them to bleed of the edge of the mouse mat.
